SUMMARY

Final-year Computer Science Engineering student with a 9.32 CGPA, experienced in building full-stack web applications using MERN, REST APIs, Java, and Python. Passionate about software engineering, automation, and scalable backend development, with hands-on experience in AI-powered applications and cloud technologies.

EDUCATION

Pursuing B.E in Computer Science and Engineering Jyothy Institute of Technology, Bengaluru Visvesvaraya Technological University (VTU), India	93.2%	2023-2027
Vedantha PU College	90%	May 2023
Holy Child English High School	99.04%	Apr 2021

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++

Front-End: HTML, CSS, React.js, Next.js

Back-End: REST APIs, Node.js, Express.js

Database: MySQL, MongoDB

Concepts: OOP, DSA, DBMS, Operating Systems, Computer Networks

Tools: Visual Studio Code, Eclipse, Jupyter, Git, GitHub, Postman, Google Cloud

CERTIFICATIONS

Google Cloud Gen AI Academy APAC 2026 – Cohort 2	Jul '26
Google Cloud Computing Foundations Certificate	Mar '25

ACADEMIC PROJECTS

Imperial Wheels – Car/Bike Rental Platform

- Built a MERN-based vehicle rental platform featuring JWT authentication, CRUD operations, MongoDB integration, and automated email notifications using Nodemailer.

Gesture Controlled Infotainment System

- Developed a gesture-controlled infotainment dashboard using Python, MediaPipe, OpenCV, HTML, CSS, JavaScript, and Leaflet API, enabling touch-free navigation and real-time gesture recognition.

EduConnect- Virtual Classroom System

- Built a web-based classroom management system to organize classes, manage student/teacher data, and send email notifications about schedules.

Khana Kreation – AI-Powered Recipe Recommendation Platform

- Developed an AI-powered recipe recommendation platform capable of generating personalized recipes based on user preferences using modern web technologies.

VIRTUAL EXPERIENCE

JPMorgan Chase & Co. – Software Engineering Job Simulation (Forage) | Jun 2026

- Built backend components using Kafka, H2 Database, and REST APIs.

Commonwealth Bank – Software Engineering Job Simulation (Forage) | Jun 2026

- Enhanced a .NET backend and React/Redux frontend while following testing and pull request workflows.

Wells Fargo – Software Engineering Job Simulation (Forage) | Jun 2026

- Designed and implemented a data model for a banking application.

Deloitte – Data Analytics Job Simulation (Forage) | Jun 2026

- Performed data analysis and forensic technology tasks to derive business insights.

LEADERSHIP & ACHIEVEMENTS

- Student Placement Coordinator** – Assisted in campus placements and recruiter coordination.
- 3rd Place – CSI Coding Challenge** – Secured 3rd place among 38 teams
- Volunteer – CSI Programmers' Day** – Helped organize technical events and activities.
- Coordinator – Pranati College Fest** – Managed event planning and team coordination.
